TOUGHTOWER™ MINI TOWER-ON-WHEELS Built Tough in Texas, USA

Solaris Technologies ToughTower™ Mini Tower-on-Wheels is designed to provide a nimble, mobile solution for a variety of applications where a full mobile site or fixed foundation is not required.

This multi-functional ToughTower™ provides an extremely lightweight yet stable tower, enabling:

- Extended wireless network capacity
- Video surveillance for law enforcement
- Audio (music, PA) for outdoor events
- Lighting for concerts and special events
- Signage at events and trade shows

Small Yet Solid

Solaris ToughTower™ Mini Tower-on-Wheels consists of a lightweight, 60' all-metal telescoping tower that can be quickly and easily moved to virtually any location.

The same ToughTower™ provides the ultimate in convenience, at a fraction of the cost of a full Site-on-Wheels.

The durable platform ensures stability during high winds or rough terrain. Best of all, the Solaris ToughTower™ Mini Site-on-Wheels can handle just about anything you can throw at it.

Ask your sales representative about customizing ToughTower™ Mini Site-on-Wheels for your application.

KEY CHARACTERISTICS
