

# GREEN TOWER INITIATIVE

## Bring Your Tower Back To Life

Do you have a mobile tower in inventory that is currently obsolete or damaged? Frayed guy wires, wrong height, rusted trailer base, or burnt out motor? Solaris' tower experts can redesign your tower into a high-capacity mobile tower that can support 1,100lb. From simple maintenance to extensive mobile tower redesign, our team of tower engineers can repair it!

- Tower Analysis
- Tower Redesign
- Hot Dipped Galvanized Steel
- 2 Year Warranty on Motors
- 10 Year Warranty on Corrosion
- Increase Mast Height
- High Capacity Unit - 1,100lb on mast
- Tower Heights from 60-150'

## WHAT PEOPLE ARE SAYING ABOUT SOLARIS

"I have found Solaris' mobile towers to be very reliable and rugged. Our team has purchased multiple units and deployed them in multiple states. The Solaris team has excellent delivery times, they have helped us out in a pinch on multiple occasions, even having a tower technician meet our crew out of state to provide on the spot service." - Brad C., *Rise Broadband*
