

HIGH-CAPACITY MOBILE TOWERS

Solaris Technologies Services is here to bring your 5G goals to life.

Solaris Technologies Services is ready to provide high-capacity tower infrastructure that will help big carriers reach the industry's 5G implementation goals of **236 million wireless subscribers by 2022**. Trust Solaris, an award-winning tower manufacturer to meet your 5G infrastructure needs.

There are over **404.58 million** wireless subscribers in the US that contributes to \$147 Billion toward the economy. With a Solaris high-capacity tower you can extend your subscriber base.

\$8.4MILLION

The current telecom industry is valued at more than 1.7 trillion dollars. Of that, **tower construction accounts for \$8.4 billion** of business. Let Solaris help expand your network.

EXPECTED GROWTH

There are currently over **200,000 towers** supporting the US wireless industry and is forecasted to increase by **8,000 tower annually**.

Tower infrastructure needs are here to stay and Solaris' high-capacity mobile towers are here to help reach that goal!

ECONOMIC IMPACT

When taking into consideration the cost of a fixed tower versus a Solaris mobile tower the cost savings are substantial. Save **thousands** with a Solaris mobile tower. We have units from 60'-150' ready for immediate deployment.

TOWER SAFETY MATTERS

- Tower safety is one of Solaris' highest priorities. All of our high-capacity mobile towers are made with US Steel, made in Texas.
- Every customer is given a 3-hour **tower certification** training on safe operation and maintenance.
